

# MAXX TRAXX™ Model Railroading Sound Effects

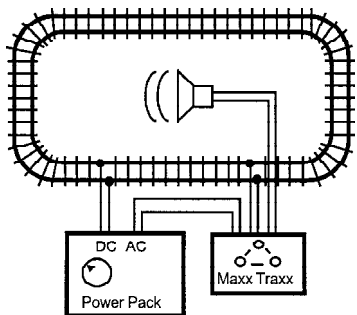

- Works with all gauges compatible with every model railroad gauge, two or three rail, from G to Z

- Use any power pack designed to work with standard power packs, DC or AC 50/60hz

- Choice of engine sounds choose **Heartland Steam,**  
**One Chime Diesel,**  
**Multi Chime Diesel,**  
**GG-1 Electric**

- Change sounds easily swap Maxx Traxx cases quickly with the unique plug-in wire harness

- Sounds come from layout place the speaker anywhere on the layout for the most realistic sound effects

- Easy to hook up

- Everything is included comes complete with speaker, wire harness, and clear instructions

## The Finest Train Sounds for Any Layout *from the Leaders in Model Railroad Sound*

No other engine sounds compare for the price. These totally realistic, high quality, digital sounds are recorded from real locomotives. Doppler shift horn and atmospheric effects, coupler slack action, and engine maintenance, are exclusive to QSI and bring amazing life to every layout. Maxx Traxx engine sounds delight every rail fan, young and old.

### Maxx Traxx™ Sounds

- Responsive Horn\*** Play long or short blasts, as you like.
- Bell and Brake Sounds\*** Control the length of the engine bell and brake sounds.
- Exclusive Doppler Run-by\*** Hear the horn and engine sounds change pitch as the train passes by.
- Atmospheric Effects** Even though the speaker is stationary, the sounds seem to be moving. You easily believe they are coming from the engine itself. This QSI exclusive effect adds maximum fun and realism.
- Continuous Engine Sounds** More than a horn and a bell, Maxx Traxx features a variety of automatic multitrack sound effects. Hear pumps, fans, injectors, and many more realistic sounds while the engines is running or just sitting on the track.
- Simultaneous Sounds** Maxx Traxx sounds stack up together. For example, listen while the motor, bell, and horn all are on at the same time.
- Throttle Dependent Sound** Listen while steam chuff and motor sounds realistically follow the throttle.
- Coupler Slack Action\*** Add realism with the sound of the couplers hitting against each other while the train leaves the station.
- Station Announcement\*** Listen to passenger activities and classic railroad station sounds, from the arrival announcement to "all aboard!"
- Engine Maintenance\*** Hear the activity around the yard as the engine is refueled and serviced.
- Emergency Stop\*** Listen to the chaos that follows as the train screeches to a sudden halt.
- Cab Chatter** Tune in to the radio chatter between the engineer and dispatcher.
- Grade Crossing\*** Hear the sounds of the crossing bell, engine motor and horn. Add Doppler Run-by\* exactly when the engine goes over the crossing.

**\*You control these sounds!**
